EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, next to last line, "signal combination circuit" has been replaced with –signal combinational circuit--.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

3. Claims 1, 2 and 4-12 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose a communication semiconductor integrated circuit device as recited in claim 1 having a signal combinational circuit with a differential circuit and attenuation means, where the attenuated signal is provided between one differential input terminal and an external terminal, the other differential input terminal connected to another external terminal via elements identical to elements that constitute the attenuation means. The prior art of record further fails to teach a communication system as recited in claim 9 having attenuation means that sets the amount of attenuation of the detected signal in such a manner that when the power amplifier is operating at the minimum output level, the level of the detected

signal input to the second external terminal becomes greater than the level of noise jumped from the first external terminal to the second external terminal. The prior art of record also fails to teach a communication semiconductor integrated device as recited in claim 12 having a signal combinational circuit including first and second attenuation means provided between the respective first and second differential input terminals of the signal combinational circuit and second and third external terminals, respectively, where the third external terminal is supplied with a predetermined potential.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
